

# Wednesday, January 21, PLC's Data Review

During grade level PLC's on Wednesday, January 21 you will need to complete the Identify Needs and Root Causes inventory located under the [Title I Tab](#) on Cardinal Spaces.

Remember you are assessing root causes in math and reading based on the [Faculty Needs Assessment Results](#).

- Click here to directly access the [Identify Root Cause Inventory](#)

**Step one** requires your grade level PLC to review the needs assessment and identify your grade level PLC

**Step two through three** requires your grade level PLC team to identify between math and reading, three priority component areas, and a written statement of what you believe is the root cause. *You will not need to write a solution for the root cause. Schoolwide SMART Goals will address all root causes.*

Please use the [Faculty Needs Assessment](#) when identifying root causes. The faculty needs assessment link is also provided at the top of the [Root Cause Inventory form](#).

Please submit only one Root Cause Inventory for each Grade level PLC team.
