

# YOUR INVITED FOR A SPECIAL FIRST TIME ENROLLMENT INTO

## A ROBOTICS CLASS

Dodge City Middle School will be offering a special 6<sup>th</sup> grade robotics class this year during fifth hour electives. Your child has been selected to participate in the nine week robotics course. The course will be provided during the first or third quarter of one of your child's elective classes.

The robotics class will provide your child with an engineering challenge; as they build a robot to play a sport-like game. The curriculum walks students through the design of their robot while presenting them with relevant STEM and Robotics principles.

At the end of the nine week course, students compete head-to-head with their robots. This curriculum isn't designed around any specific competition game. The lessons learned and concepts described apply equally to a robot being built for an in-classroom game.

**If your child is interested in participating in the robotics course you will need to sign-up with your child's counselor during enrollment on August 3, 2017.**
